

LUIS FIGUEROA

Welder, hardware engineer, software engineer. In that order.

Orlando, FL luifig19@gmail.com (407) 861-2231 github.com/LuiFig19 luifigueroa.com

[000] SUMMARY

Self-taught hardware engineer. Day job in production fabrication, home lab the rest of the time. PCBs in KiCad, firmware in C, full-stack software, field IT on weekends. Four IoT devices designed and brought up, one SaaS product shipped to a paying customer, and AstraRMM co-founded with one partner.

[001] EXPERIENCE

PRODUCTION LEAD 2021 - PRESENT

Ravens Marine, Aluminum Structural Fabrication
Central Florida

- Run production on complex aluminum structural fabrication: read technical drawings, plan weld sequences, and troubleshoot fit-up and alignment on deadline-driven jobs.
- Lead the welding floor and qualify junior welders - demonstrate techniques, review work quality, and sign off when production-ready.
- Own fabrication tasks end to end from drawing review through weld-out, QC, and delivery with minimal supervision.

CO-FOUNDER & HARDWARE ENGINEER 2025 - PRESENT

AstraRMM (with Jeremiah Rivera)
Orlando, FL / weekends and free time

- Co-founded AstraRMM, a custom RMM platform: agents, server, real-time alerting, technician dashboard.
- Designed and built AstraRMM IoT hardware - Air Sensor, mmWave Motion Sensor, and Network Monitor - on ESP32-S3 with commercial mmWave modules: custom C/C++ firmware, hand wiring and soldering, 3D-printed enclosures, bring-up and deployment.
- Custom KiCad PCB for the Air Sensor (schematic, layout, fab, assembly). Flight Controller PCB designed separately in KiCad. Motion and network nodes built from COTS dev boards and modules, not custom PCBs.
- Contract field IT through Fanatic Node for small businesses: Windows recovery, BitLocker, drive and RAM swaps, M365 and Entra ID admin, Conditional Access, Huntress EDR, Comet Backup, PoE camera installs.

[002] SHIPPED

TaskChrono. Solo full-stack SaaS for time tracking and reporting (Next.js, TypeScript, PostgreSQL). Shipped to a paying customer, still in active use.

[003] STACK

HARDWARE	KiCad, ESP32-S3, PoE 802.3af, Ethernet PHY, Thread, BLE, OTA, Watchdog
FIRMWARE	C, C++
SOFTWARE	Next.js, TypeScript, PostgreSQL, Docker, WebSocket, REST
IT	Windows 10/11, Microsoft 365, Entra ID, Conditional Access, MFA, Huntress, Comet Backup, UniFi, DNS / DHCP / TCP/IP, VPN
PRODUCTION	Welding, technical drawing reading, sequencing, floor leadership

[004] CERTIFICATIONS & EDUCATION

CERTS	CompTIA A+ in progress (Professor Messer). Network+ and Security+ planned.
EDU	Self-taught technical background. Home lab development, project-based learning, applied field experience.
