

LUIS FIGUEROA

Welder, hardware engineer, software engineer. In that order.

Orlando, FL · luifig19@gmail.com · (407) 861-2231 · github.com/LuiFig19 · luifigueroa.com

[000] SUMMARY

Self-taught hardware engineer working out of a fabrication shop by day and a home lab the rest of the time. Designs PCBs in KiCad, writes firmware in C, ships full-stack software, and runs field IT on weekends. Four production-ready IoT devices. One SaaS product with a paying customer. Co-founded a managed-IT operation and its custom RMM platform with one partner.

[001] EXPERIENCE

PRODUCTION LEAD

2021 — PRESENT

Ravens Marine — Aluminum Structural Fabrication
Central Florida

- › Run production workflows on complex fab projects — reading technical drawings, managing sequencing, troubleshooting fitment under deadline.
- › Lead and direct junior welders on the floor — answering technical questions, correcting process issues, bringing crew up to qualified.
- › End-to-end ownership of tasks from drawing to delivery without supervision.

CO-FOUNDER & HARDWARE ENGINEER

2025 — PRESENT (weekends, evenings, free time)

Fanatic Node & AstraRMM (with Jeremiah Rivera) — Side venture
Orlando, FL

- › Co-founded Fanatic Node, an Orlando-based managed IT operation, and AstraRMM — the custom remote monitoring + management platform we built for it (agents, server, real-time alerting, technician dashboard).
- › Designed four IoT PCBs in KiCad — Astra AirSensor (SEN55 + PoE), AstraRMM Monitoring Device (ESP32-S3 + PoE), Mesh Motion Network (mmWave + Thread), and a Network Monitoring Appliance. Drawn, routed, fabricated, hand-assembled, flashed, and brought up.
- › Firmware in C / C++ on ESP32-S3. 3D enclosure design and prototyping.
- › Field IT for small-business clients: Windows 10/11 recovery, drive and RAM swaps, BitLocker resets, admin-password recovery, PoE camera installs, Microsoft 365 + Entra ID administration, Conditional Access, Huntress EDR, Comet Backup.

[002] SHIPPED & SELF-DIRECTED

TaskChrono

SaaS time-tracking and reporting platform. Built solo in Next.js, TypeScript, and PostgreSQL — hosting, database administration, authentication, and bug resolution. Shipped to a paying customer; still in active use.

Home Lab

Always-on Windows administration, virtualization, Active Directory, DNS, and M365 practice environment. Where the PCBs above actually run today.

[003] STACK

HARDWARE	KiCad · ESP32-S3 · PoE 802.3af · Ethernet PHY · Thread · BLE · OTA · Watchdog
FIRMWARE	C / C++
SOFTWARE	Next.js · TypeScript · PostgreSQL · Docker · WebSocket · REST

Windows 10/11 · Microsoft 365 · Entra ID · Conditional Access · MFA · Huntress · Comet Backup · UniFi
· DNS / DHCP / TCP/IP · VPN

PRODUCTION Welding · Technical drawing reading · Sequencing · Floor leadership

[004] CERTIFICATIONS & EDUCATION

CERTIFICATIONS

- CompTIA A+ — In progress (Professor Messer)
- CompTIA Network+ — Planned
- CompTIA Security+ — Planned

EDUCATION

Self-taught technical background — home lab development, project-based learning, applied field experience.
